

Fruit Data

Directions: You are to write a C++ program that meets the instruction requirements below.

Deliverables:

Your C++ source code file. (The file with the .CPP extension). No other files will be accepted.

- A screenshot of your program running.

Program Instructions:

Define a struct, fruitType, to store the following data about a fruit: Fruit name (string), color (string), fat (int), sugar (int), and carbohydrate (int). Write a program that declares a variable of type fruitType, prompts the user to input data about a fruit, and outputs the fruit data.

1.

Grading Criteria Assignments	Maximum Points
Program accomplishes requested operations per instructions	40
The code works and meets all assignment specifications	30
The code is organized and easy to follow and output is clear and clean	20
Uses software tools correctly and efficiently	10
Total	100
